

COMPANY PROFILE

Sourcing, freight and Amazon logistics.

For 7 and 8-figure Amazon brands and the agencies that run them. Better suppliers, lower landed cost, safer shipments, higher margin.

WHAT WE DO

Seven capabilities, two service lines.

- **Freight Forwarding**
Ocean, air and express. Consolidated where it saves money, split where it saves time.
- **Amazon FBA & FBM**
Prep to current inbound spec, FNSKU labelling, carton limits and split-shipment planning.
- **Sourcing & Supplier Vetting**
Factories verified against export records. Traders in disguise filtered out before you wire.
- **Factory Inspection & QC**
Pre-production, in-line and pre-shipment inspection with photo and video proof.
- **Warehousing & Fulfilment**
Storage, pick and pack, and overflow capacity close to the port.
- **Customs & Compliance**
HS classification, duty planning and documentation handled end to end.
- **Supply Chain Consulting**
Landed-cost modelling and lane strategy for brands scaling past their current forwarder.

HOW IT WORKS

WHO WE SERVE

For Amazon brands

Established 7 and 8-figure FBA and private-label sellers with real volume. Supplier vetting, landed-cost negotiation, QC and live shipment tracking, so margin holds up long after the deposit is paid.

For Amazon agencies

Run sourcing and shipping for every brand on your books through one account manager, one vetting standard and one consolidated invoice, with white-label reporting you can put your own name on.
